

Bustracks Student Transportation Software™ offers a different way to manage student transportation.

Bustracks' all-inclusive routing process uses a nationwide map.

We won't require you to purchase additional out-of-district maps like most transportation systems. Bustracks also offers the eTracks Reporting System™ for all daily, monthly, and annual report requirements. This includes multiple standard reports and an easy method for creating customized reports.

Bustracks' installation process is easy.

Busy school district and bus contractor personnel do not have much time to install, learn, or maintain a complicated transportation software program. Bustracks does NOT require all bus stops and students to be located on a map in order to create a bus roster. This speeds implementation from months and years to an average of just 2-3 weeks, including training.

Bustracks is the most time-efficient system to use on a daily basis.

It tracks daily student riders, all public and non-public school calendars, all vehicle and contract information, and all loaded and empty bus miles. There is no need to track this information in a separate spreadsheet or program.

Bustracks is a Pennsylvania-based company that knows Pennsylvania school district transportation issues.

We have successfully counseled many districts to help them streamline their operation and increase their reimbursement. We offer this transportation expertise to our customers at no additional charge. Did you catch a demo of our NEW GPS PLUS at PASBO? If not, give us a call at **1-800-303-2921** or visit us at **www.bustracks.com** and find out how Bustracks Transportation Management Services can work for you!
