

Graduate to Bustracks Student Transportation Software™ for the new school year.

Bustracks makes the complex easy.

As school districts across Pennsylvania wrap up the 2009-2010 school year, transportation departments are already busy preparing for the 2010-2011 year. New bus routes need to be designed, new kindergarten students need bus assignments, and current bus riders may require new assignments if they “graduate” to a new school.

Bustracks Student Transportation Software™ makes this process easy in three simple steps:

1. Enter new kindergarten students in the current year data base and identify as “**Early Registration.**” This allows you to assign bus routes for the new school year without affecting the current year transportation reimbursement reports.
2. Create “**Graduation Paths**” for students moving to a new grade and school building. Indicate if a new bus assignment is needed for the new school.
3. Perform the “**Graduation Process.**” This takes about 10 minutes. BusTracks automatically changes the student grade and reassigns riders to new bus routes based on the new school assignment. A detailed Graduation Report summarizes all students with new and/or proposed bus assignments.

Because every minute counts.

Summer is a busy time for school transportation professionals as they prepare new bus routes and ensure all students are properly assigned to those routes. Using Bustracks simplifies these processes, allowing transportation professionals to focus on all the other requirements of starting a new school year.
